European Journal of Operational Research 73 (1994) 597–599
North-Holland

Contents Volume 73

1 Models for the optimization of regional wastewater treatment systems (*Invited Review*)
J.J. de Melo and A.S. Câmara
17 A goal programming approach to investment decisions: A case study of fund allocation among different shopping malls
R. Khorramshahgol and A.A. Okoruwa
23 On operational research and decision aid
B. Roy
27 A note on the predictability of *Finnish stock market returns*: Evidence from stock index futures markets
T. Martikainen and V. Puttonen
33 The short-run shutdown decision when output price and initial wealth are random
R.A. Sproule
39 A compromise solution for claims problems
S. Lahiri
44 The value of a firm with periodically changing profitability
L.L. Ghezzi
50 EOQ models with general demand and holding cost functions
M. Goh
55 Determining optimal pool size of a temporary Call-In work force
O. Berman and R.C. Larson
65 A parts selection model with one-way substitution
S. Chand, J.E. Ward and Z.K. Weng
70 Multivariate multiple linear regression based on the minimum sum of absolute errors criterion
S.C. Narula and P.J. Korhonen
76 Decision making by classical test procedures using an optimal level of significance
C. Das
85 Combining regression diagnostics with simulation metamodels
R.P. Panis, R.H. Myers and E.C. Houck
95 Simultaneous determination of capacities and load in parallel M/M/1 queues
H. Lee
103 Practical methods for queue length behaviour for bulk service queues of the form $M/G^{0,C}/1$ and $M(t)/G^{0,C}/1$
J. Mejía-Téllez and D. Worthington
114 The median tour and maximal covering tour problems: Formulations and heuristics
J.R. Current and D.A. Schilling
127 An approximation algorithm for the license and shift class design problem
K. Jansen
132 Discharge allocation for hydro-electric generating stations
E.M. Klein and S.H. Sim
139 Some results concerning post-infeasibility analysis
N. Chakravarti
144 A note on deriving weights from pairwise comparison ratio matrices
A. Hashimoto
150 Constructing the set of efficient objective values in linear multiple objective transportation problems
R.J. Gallagher and O.A. Saleh
164 Characterizing an optimal solution to the linear bilevel programming problem
Y.-H. Liu and S.M. Hart
167 On the Dietrich–Escudero approach for solving the 0–1 knapsack problem with a 0–1 objective function
L.F. Escudero, G. Pérez and A. Garin
169 A computational note on the Martello–Toth knapsack algorithm
F.J. Vasko
172 The Newton direction and the cutting plane
M. Gaudioso and M.F. Monaco
175 On the generalized 2-Peripatetic Salesman Problem
J.B.J.M. De Kort and A. Volgenant
181 An experimental comparison of three heuristics for the WVCP
P.S. Laursen

0377-2217/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

185 Comment on Elmaghraby and Herroelen's "The scheduling of activities to maximize the net present value of projects"
C. Sepil
188 A computational improvement for a shortest paths ranking algorithm
J.A. de Azevedo, J.J.E.R.S. Madeira, E.Q.V. Martins and F.M.A. Pires
192 A linear time algorithm to solve the weighted perfect domination problem in series–parallel graphs
C.-C. Yen and R.C.T. Lee
199 The growth of multi-constraint random knapsacks with various right-hand sides of the constraints
K. Szkatuła

Special Issue on Stochastic Control Theory and Operations Research

205 Editorial
R. Neck
209 Applicable stochastic control: From theory to practice
C.S. Tapiero
226 Optimum design of measurement channels and control policies for linear-quadratic stochastic systems
T. Başar and R. Bansal
237 Boundedly optimal control of piecewise deterministic systems
A. Haurie, A. Leizarowitz and Ch. van Delft
252 Some comments on a simple nonlinear filter with application to adaptive control
N. Christopeit
265 Modeling economic time series by forward and backward state space innovation models and IV estimators
M. Aoki
279 On polychotomous search problems. *Dedicated to Prof. Dr. W. Meyer-König on the occasion of his 80th birthday*
K. Hinderer and M. Stieglitz
295 Risk-sensitivity, large deviations and stochastic control
P. Whittle
304 Stochastic and robust control of nonlinear economic systems
B. Rustem
319 On the complexity of linear quadratic control
A.L. Norman
331 Optimal feedback production planning in a stochastic two-machine flowshop
S. Lou, S.P. Sethi and Q. Zhang
346 Aggregate production planning by stochastic control
R.F.C. Shen
360 The stochastic dynamic product cycling problem
U.S. Karmarkar and J. Yoo
374 A dynamic model of the firm with uncertain earnings and adjustment costs
P.M. Kort
384 Stochastic optimum control of macroeconometric models using the algorithm OPTCON
R. Neck and J. Matulka

407 Review of delay-time OR modelling of engineering aspects of maintenance (*Invited Review*)
R.D. Baker and A.H. Christer
423 A generalized oil exploration problem
L. Benkherouf
430 An information-economics approach to quality control attribute sampling
B. Ronen
443 Weighted matching with vertex weights: An application to scheduling training sessions in NASA space shuttle cockpit simulators
C.E. Bell
450 The case for research in decision support systems
S.S. Syam and J.F. Courtney
458 Determination of reorder points for spare parts in a two-echelon inventory system: The case of non identical maintenance facilities
A. Shtub and M. Simon
465 Ordering policies for the cyclical replenishment problem given leadtime-dependent discounts
K.F. Matta
472 Maximal wearing-out of a deteriorating system: An optimal stopping approach
W. Stadje

480 An adaptive statistical method for the discriminant problem
C.A. Markowski
487 Efficiency improvement in data envelopment analysis
C. Kao
495 Solution procedures for cutting lumber into furniture parts
C. Carnieri, G.A. Mendoza and L.G. Gavinho
502 On tabu search for the location of interacting hub facilities
D. Skorin-Kapov and J. Skorin-Kapov
510 Weights improvement in column aggregation
S. Storøy
517 Strong linear programming relaxations for the orienteering problem
A.C. Leifer and M.B. Rosenwein
524 Controlled dual perturbations for central path trajectories in geometric programming
J. Zhu, K.O. Kortanek and S. Huang
532 An algorithm for decomposing the parametric space in multiobjective dynamic programming problems
M.A. Abo-Sinna and M.L. Hussein
539 Obtaining clique, cover and coefficient reduction inequalities as Chvatal–Gomory inequalities and Gomory fractional cuts
B.L. Dietrich and L.F. Escudero
547 Derivation of duality in mathematical programming and optimization theory
P.K. Johri
555 A multi-KP modeling for the maximum-clique problem
F. Della Croce and R. Tadei
562 The three-dimensional bottleneck assignment problem with capacity constraints
S. Geetha and M.N. Vartak
569 Complexity of a class of nonlinear combinatorial problems related to their linear counterparts
S.P. Sethi and W. Kubiak
577 Pseudo-invexity and symmetric duality in nonlinear fractional programming
S. Nanda and L.N. Das
583 On some classes of matrices related to solving linear complementarity problems as linear programs
A. Foul
590 A global approach for general 0–1 fractional programming
H.-L. Li

597 Contents to Volume 73
